

FLAV-X

A natural solution to both
abiotic and biotic attack

FLAV-X is a complex blend of plant extracts that can be used to enhance both plant growth and health. FLAV-X contains plant hormones that significantly boost the plant's own defence system, thereby making the plant far less vulnerable to both abiotic and biotic stresses. The Formula is centred around Naturally occurring plant flavonoids. These flavonoids have been shown to be highly effective against a large number of pests and pathogens.

Benefits

- Improves plants natural defense system
- Alleviates symptoms of stress and damage caused by an attack does not kill but deters and discourages pests
- Environmentally friendly
- Stimulates plant growth, health and productivity

Application

Min 2 Ltr/Ha in 600 Ltr of water at weekly intervals. Can be used as plant and soil bio stimulant; Wash in soil applications with 2-5 mm irrigation direct after application. (depending on soil type).

600 Litres water volume

PACK SIZE:

2 Litres

Promote

Promote works by activating specific physiological processes within plants

Promote contains high quality carbohydrates, L-amino acids, oligopeptides, polypeptides, alginates, mannitol, oligosaccharides and polysaccharides, yeast extract, natural organic acids & betaines.

Promote is a proprietary blend of plant extracts and organic compounds that trigger the plant into thinking it's under Biotic attack and Abiotic stresses. This leads to a synergistic result of higher chlorophyll levels, greater root mass and a healthier denser sward that ultimately is able to withstand the riggers and stresses that it is put under on a daily basis.

Benefits

- Increased root development
- Increased mineral uptake from the soil and into the plant
- Relieves stress in plants caused by extreme weatherconditions, pests and diseases
- Increased turf density and quality

Application

10-20 litres per hectare
300-600 litres water volume

PACK SIZE:
10 Litres
